

Inaugural Bendigo Simulation Showcase

21 Nov 2016

Simulation-based education technologies are advancing the ways healthcare teaching and learning is delivered. Join us at this first Bendigo Simulation Showcase to explore changes and opportunities.

Monash Rural Health, La Trobe University and Bendigo Health are partnering to offer Bendigo regional health professionals an insight into developments in the field, and to promote new connections. This full-day event showcases facilities and expertise at both universities. The day is fully catered with numbers capped at 40, but we will maintain a wait list. Register by Monday 14 November to reserve your place.

Who should attend?

Bendigo region health professionals whose work involves teaching and learning or who have an interest in simulation learning.

Goals of the showcase

- To demonstrate the physical, technical and knowledge simulation resources that exist in the Bendigo Region.
- To develop links that enhance interprofessional working, research and education in undergraduate, postgraduate and vocational healthcare environments.
- To understand stakeholders' views on how to effectively integrate simulation into enhancing Bendigo Healthcare workforce development, from undergraduate to senior clinician level.
- To promote collaborative working towards a Simulation Community of Practice constituted from Bendigo institutional stakeholders in simulation based education.

When: Monday 21 November 2016
9:00 am to 5:00 pm

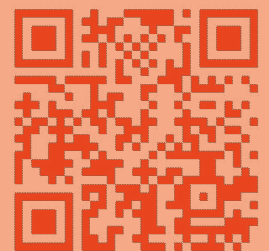

Where: Clinical Teaching Building
La Trobe Rural Health School
109 Arnold St, Bendigo

Clinical Skills & Simulation Centre
Monash Rural Health Bendigo
26 Mercy Street, Bendigo

Cost: Free

Queries: Matthew Truscott,
Simulation Education Technician,
